 - American Red Cross CPE/AED Certification
-

I have been an educator for the past 28 years and I am an Alumni of Bisbee Unified School District, class of 1978. My level of instruction has spanned kindergarten through College. I feel it is important to ensure that the children of BUSD #2 are equipped with 21st Century Skills so they will be prepared for life after high school. Education is the foundation for a successful adulthood and without an adequate foundation our students will not be prepared to meet the challenges of today's world.

I feel with my background in education and community work I can provide a positive and unbiased influence on decision making at the Board level. My experience with the district will also provide an inside view of what challenges are occurring in the District.

I believe in transparency and feel that the community, staff and students should play an active role in decision making and have ample opportunity to express their concerns about policy and the management of the district.

I would appreciate your vote in November

Thank you,

Joni Giacomino
